To Whom It May Concern:

EXHAUSTO realizes that the design of the fan may not be conducive to "old house" designs and we welcome the introduction of the European Copper Chimney Pot, which will accommodate and hide the products without interfering with its operations.

We fully endorse the use of the European Copper as an enclosure for the EXHAUSTO Chimney Fans model RS-9, RS-12, RS-14, and RS-16.

Sincerely,

Steen Hagensen
President

EXHAUSTO
